

DEBUNKING THE MYTHS ABOUT 3LCD PROJECTORS

MYTH 1

Every projector is the same.

TRUTH

Not all projectors are created equal. Only 3LCD projectors are able to achieve brilliant and true to life images as well as deliver a superior colour balance with equal white and colour brightness. Further, with no rainbow effect, users are also able to enjoy a more comfortable viewing experience. Epson 3LCD projectors are therefore a perfect choice, whether for work or play. Insist on High Colour Brightness in every projector you buy. Find out more at epson.com.sg/truecolours

TRUE REALISM **TRUE BRIGHTNESS** **TRUE COMFORT**

1. Gamut volume in brightest mode, measured by a third-party lab in 3D in the CIE L*a*b* coordinate space. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP projectors based on NPD sales data for May 2017 - April 2018.
2. Color brightness (color light output) in brightest mode, measured by a third-party lab in accordance with IESNA 19.4. Color brightness will vary depending on usage conditions. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP projectors based on NPD sales data for May 2017 - April 2018.

MYTH 2

I need to shut off all natural and electrical light sources to comfortably watch a projection screen.

TRUTH

With our current line up of projectors boosting equal colour and white brightness, you no longer need to darken the room in order to comfortably view what's on the screen.

Better Products for a Better Future™
For more information on Epson's environmental programmes, visit http://global.epson.com/SRIenvironment.

3 Years Warranty (Carry In) on all listed models.

*Leading Epson business and education projectors vs. leading 1-chip DLP projectors, selected according to NPD data as of July 2015. Based on U.S. research conducted by Radius Research.
*World's No.1 Projector brand (2001 - 2019) and No.1 Home Projector brand (2015 - 2019) based on Futuresource Consulting data.

By participating in the promotion redemption, customers consent to Epson's collection and use of customers' personal data for promotional and marketing purposes. Please refer to Epson's privacy policy at www.epson.com.sg/privacypolicy page.

MYTH 3

Projectors are harmful to my eyes and cause eye strain.

TRUTH

Projectors are a better choice for your eye health. Epson projection technology is scientifically proven to be less stressful on the eyes and minimises the negative effects of prolonged viewing. Projectors use light reflection which is more comfortable and gentler on the eyes compared to the strong direct blue light exposure from conventional TVs. Another benefit with projectors is that the image size is scalable and you can achieve a 80 inch projection easily vs a common TV size that is usually less than 70 inches. You can enjoy the flexibility of having a bigger display, which also means less strain for your eyes!

MYTH 4

Projectors are less reliable than TVs.

TRUTH

Epson is committed to delivering high-quality products which exceeds customers' expectation worldwide. Our 3LCD panels have gone through the most stringent quality control to deliver sharp and true-to-life images. With 3 years carry-in warranty, you can enjoy the absolute peace-of-mind.
