

**CREATING A FULL SPECTRUM  
OF POSSIBILITIES FOR  
HEALTHCARE.**

# We Understand Healthcare

**In the fast-paced, high-pressure world of healthcare, you need technology that's easy to use, that safeguards confidential information and performs perfectly every time.**

From processing patients and labelling medicines to printing, archiving and displaying data, our technology helps you cut costs and frees you up to focus on what really matters – patient care.

## Cost-effective

Beat budget cuts with products that are cost-effective to buy, run and maintain.

## Safe and secure

Store and retrieve confidential patient data safely with secure scanning, printing and archiving.

## Improve workflow

Intuitive technology saves time, improves workflow and helps people work collaboratively.

## Greener

Engineered to be kinder to the environment and streamline costs on the way.

Help improve patient safety with durable on-demand colour wristbands and labels.

Store and distribute patient records safely and securely on CD/DVD with our easy-to-use Discproducers™.

Keep pace with the busiest healthcare environments with our WorkForce Pro printers, which are fast, economical and ecological.

# All You Need to Work Efficiently

## Highlight Critical Information

Produce durable, long-lasting labels that are water and chemical-resistant in a wide range of tapes and text colours. Our hard-working mobile and desktop label makers also allow you to print from your smartphone or tablet, helping to improve organisation, reduce errors and save time.

## Scanning Versatility

Compact in design, Epson's sheetfed scanners are ideal for frontdesk registration applications, such as scanning of ID cards and medical records. With networking capability, patients' information can be sent to the doctors instantly.

## Get Clearer Insights

Our powerful installation projectors have a DICOM simulation mode that allows clinicians to view greyscale medical images such as X-rays. This is ideal for discussions, seminars and training.

## Print Wristbands Instantly

The Epson on-demand colour label printer produces durable full-colour wristbands, helping to reduce the risk of errors and ensure better patient care and safety.

## High-Speed Durable Colour Labels

Print detailed, high-quality on-demand colour labels quickly and efficiently. DURABrite™ Ultra pigment ink ensures that labels dry quickly and are smudge, water and fade-resistant, helping to highlight important information on specimens and medicine containers.

## Safeguard Patient Data

Save time and money by producing tamper-proof CDs and DVDs to store, archive and share confidential patient data, without the need to rewrite for up to 100 years.

## High-Quality Print on Hand

Our award-winning WorkForce Pro printers provide busy healthcare environments with fast, reliable printing, scanning, copying and faxing of medical reports and doctor's memo.

# Cost-Effective Healthcare

We know that it's critically important for you to get the best possible value from the technology you buy.

In healthcare, cost pressures are a reality, and stakeholders on all sides are keen to see that money is spent wisely. Epson's innovative technology combines competitive prices with money-saving features, ensuring you can cut costs without compromising on quality.

## Cut waste

We've created specialised healthcare technology that helps you use your resources as efficiently as possible.

- Use our **LabelWorks™** range to produce durable and resistant labels on-demand, cutting waste.
- Our **LabelWorks** range prints long labels with smaller margins, ensuring less wastage and more labels for your money.

## Cut consumables

Epson consumables are long-lasting and offer excellent value for money.

- Epson **ink tank system printers** make high-quality professional printing affordable for surgeries, clinics and hospitals.
- High-capacity, space saving individual ink cartridges and bottles are easy to replace and efficient, as you only need to replace the colour that's used.
- Long-lasting filters and lamps in our **projectors** save money and reduce downtime, while the eco mode conserves energy.

## Reduce storage costs

Healthcare organisations are obliged to store patient records safely and securely. Let us help you keep those costs to a minimum.

- We guarantee that you can create more than 1,000 fully printed discs with the **Discproducer** using just one set of ink cartridges.

## Cut total cost of ownership

Given today's budget constraints, technology must be both affordable to buy and cost-effective to maintain.

- Epson **projectors** have an affordable initial purchase price, easy and flexible installation, and low maintenance costs. EasyMP software also helps you monitor and control projectors across a network, saving you time and money.
- **Epson Device Admin** allows you to monitor the usage, supplies and status of your printer fleet with one application. You can save cost by planning how your printer is deployed.
- Epson **ink tank system printers** help you reduce your printing costs significantly as they offer the lowest printing costs in the region<sup>1</sup>.

# Improve Workflow

In a busy healthcare environment, technology should simplify everyday tasks and make working life easier.

On the wards and in the pharmacy, in surgeries and offices, Epson products work hard to help ensure everything runs smoothly. Intuitive to use and requiring minimal training, they save time, improve workflow, and help you communicate vital messages quickly and clearly.

## Hassle-free equipment

Let Epson get on with the job – and let you get on with yours.

- High-capacity ink cartridges of the **WorkForce Pro printers** are incredibly easy to replace. Simply push and click to remove and replace cartridges. The ink packs on the WorkForce Pro WF-R8591 are also easy to replace and allow you to print up to an impressive 75,000 pages.
- Epson **ink tank system printers** are equipped with integrated ultra-high capacity ink tanks that reduce downtime caused by consumable replacements. The tanks can be refilled easily, without causing any mess.
- The **Discproducer** will publish 30 CDs or 15 DVDs an hour, unattended. An internal robotic arm ensures accuracy.

## React on the spot

With Epson, it's easy to react to changes as they happen.

- With our **on-demand colour label printer**, produce large volumes of wristbands quickly and easily, to match changing patient lists.
- A change of dose or prescription? It won't be a problem with Epson's versatile **label printers** which produce short print runs quickly and on-demand.

## Save time

Speed up everyday tasks and keep downtime to a minimum.

- Without the need to replace or refill frequently, our high capacity ink cartridges and ink tanks help you achieve higher page yields while reducing downtime.
- Our EasyMP software allows you to monitor your projector fleet remotely, so it's simple to check the status of individual units to ensure they are available when required.
- Epson **business scanners** make it quick and easy to share scans across a team.

## Work on the move

When your staff are highly mobile, your technology needs to keep pace.

- With the Epson iProjection App, you can project directly from your smartphone or tablet<sup>2</sup>.
- With Epson Connect<sup>3</sup>, you can now print to an Epson printer by using an app or simply by sending an email to it. Scanning of urgent documents can also be done via the Epson iPrint app.
- With **LabelWorks** you can use the Epson iLabel App to design, create and print durable labels directly from your smartphone or tablet<sup>4</sup>.

## Share information

Help healthcare professionals connect and share information quickly and easily.

- Our **EB-1400Wi** series of interactive projectors make it easy to share content, interact and discuss patient cases. They replace traditional whiteboards and flip charts, and users can annotate the projected image using interactive pens. Amended content can be immediately printed, saved or shared electronically with participants.
- With the **Discproducer**, data is at your fingertips whenever you need it, from patient details and billing to X-rays and CT scans. As the data is stored securely and digitally, it's simple to share it across departments and with patients too.

# Be Safe, Be Secure

Patient safety and data confidentiality in healthcare have never been more important.

With the exponential growth in electronic data and the requirement to keep patient data confidential, healthcare organisations need to find ways to store large amounts of information safely.

The issue of patient safety is equally critical, and often depends on attention to detail: the dose of a prescription, an allergy alert, the words on a label.

## Keep patients safe

Protect patients with full-colour wristbands that improve safety, avoid misprescription and reduce human error. The Epson **on-demand colour label printer** produces durable wristbands that:

- Clearly identify important information such as allergies, warnings, diet restrictions and blood type.
- Are long-lasting and durable, and made of anti-bacterial and anti-allergic material.

## Secure your documents

Use clever extra security features to make sure your information doesn't get into the wrong hands.

- **WorkForce Pro printers** reduces mishandling of confidential documents by setting a PIN release password to your print job.
- You can protect confidential electronic documents with our **WorkForce scanners** by saving the output as a secured password protected PDF file. A password can also be set to the scanner to prevent misuse.
- Our **on-demand colour label printers** use ink instead of ribbons, leaving no mirror image on the print out, making your data more secure.

## Safeguard patient data

We lead the way in the archiving patient data. **Discproducers** are the right fit for hospital applications, as they're reliable, secure and easy to use:

- Quickly archive data and share with patients.
- Protect data from loss and misuse.

## Communicate with colour

Bright, durable colours on labels make it easy for healthcare professionals to spot key details of medicines, samples and prescriptions – and can save lives.

- Highlight colour codes, alerts and warnings by printing with DURABrite Ultra/Pro inks – for long-lasting, high-impact colours.
- Minimise the risk of errors with sharp text and colour-enhanced safety information on specimens and pharmacy labels produced by the Epson **on-demand colour label printer**.
- Emphasise important information on prescriptions with a second colour using the Epson **ColorWorks™ C3510/C3400**.

# Greener Healthcare

**Emissions and carbon footprint are becoming increasingly pressing concerns in the healthcare sector.**

At Epson, it's a point of principle to develop clean technologies, and to design products that consume less power. We have engineered our entire range to be cleaner and greener, so we can help you meet your environmental targets – and save money at the same time.

## Cut power, cut consumption

We're constantly looking for new ways to cut power consumption.

- Our **WorkForce Pro printers** require no warm-up time, unlike laser printers. This "no-heat" technology consumes less power compared to laser printers.
- Our **projectors** are packed with features, including an eco mode which reduces power consumption and extends the lamp life, while the sleep timer ensures projectors are in standby when not in use. Our eco menu places all of these features in easy reach and even indicates how efficiently the projector is running.
- With Epson's ReadyScan LED technology, our **scanners** do not require warm-up time. LEDs used in the scanners are also mercury-free and energy-efficient.

## Doubly efficient

It's easy to be green when technology makes smart choices for you. With our **WorkForce Pro printers**, double-sided printing can reduce unnecessary paper wastage.

## Better working environment

Our PrecisionCore™ technology helps you meet your environmental targets.

- Epson's clean, no-heat technology produces no ozone gas or any fan noise during or after printing.
- The **WorkForce Pro printers** occupy smaller footprints as no ventilation space is needed around the printers.
- Also, **WorkForce Pro printers** do not release harmful particles when printing, thereby keeping your working environment clean and healthy.

**Zero Warm Up Time**

WORKFORCE DS-6500  
SCANNER

WORKFORCE PRO  
SERIES

1. As of 10 April 2015, the Epson L-series offers users the lowest cost per page (black and colour combined) for any printer using genuine branded supplies from its own manufacturer. This is based on the MSRP listed on the manufacturers' websites in 5 major ASEAN markets.
2. iProjection App available on Android and iOS devices.
3. Epson iPrint requires a wireless connection. Epson Email Print, Epson Remote Print Driver and Epson Scan-to-Cloud require a connection to the internet. For more information, supported languages and devices, please visit [www.epson.com.sg/connect](http://www.epson.com.sg/connect)
4. Compatible with LabelWorks LW-1000P. Download the Epson iLabel App from the Apple App Store and Google Play Store.

5. Compared against similarly-priced leading 1-chip DLP® business and education projectors based on NPD data from July 2011 through June 2012 (available from [www.npd.com](http://www.npd.com)). Colour brightness (colour light output) measured in accordance with IDMS 15.4. Actual colour brightness will vary depending on actual usage conditions. 3LCD® is a registered trademark of Seiko Epson Corporation. DLP® is a registered trademark of Texas Instruments, Inc. and its use here does not imply any affiliation with or endorsement by them.
6. Survey conducted by Futuresource Consulting Limited for the period from 2001 to 2014.
