

**Epson announces new range of compact, 3LCD installation laser projectors with interchangeable lenses**

**Epson EB-L1070UNL and EB-L1060UNL projectors**

**15 May 2019** – Epson announced its new range of 3LCD laser installation projectors, the EB-L1060UNL and EB-L1070UNL, which are Epson's most versatile installation projectors complete with 4K enhancement and supporting interchangeable lenses. The projectors will be showcased at Infocomm Southeast Asia 2019 event from 15 to 17 May 2019, at Bangkok International Trade and Exhibition Centre (BITEC) in Thailand.

The EB-L1060UNL and EB-L1070UNL projectors come with an inconspicuous, clean-lined design and quieter fan noise, ensuring they fit seamlessly into a wide variety of environments, from visitor attractions to lecture theatres, museums to meeting rooms.

Each projector is available as 'body only' which provides the user with a wide choice of optional lenses. This flexible approach enables the user to fit the most appropriate lens for any given scenario. There are 12 interchangeable Epson lenses available, covering short to long throw projection.

The EB-L1070UNL and EB-L1060UNL produce impressive laser image quality and create rich colours, high contrast, clear whites, defined shadow detail and deep blacks for outstanding images. These are achieved through WUXGA resolution, 4K enhancement technology, laser light source technology, up to 7,000 lumens, high colour light output, 3LCD technology and contrast of over 2,500,000:1.

Installation is easy and their fit-and-forget reliability means they can be positioned even in hard-to-access areas with confidence. They also benefit from 360-degree installation flexibility and are quieter and lighter than the previous series. Once fitted, these laser projectors are maintenance free for 20,000 hours<sup>1</sup>.

---

<sup>1</sup> 20,000H life for Laser light source: Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m<sup>3</sup> of particulate matter. Time varies depending on usage conditions and environments. Replacement of parts other than the light source may be required in a shorter period.

Ng Ngee Khiang, Regional Director of Visual Products and Robotic Solutions Division, Epson Singapore, says, "These new range of installation laser projectors is a welcome addition to our already impressive line-up. Their powerful, detailed output is complemented by a design subtlety that allows users greater installation flexibility and reliability."

Along with these projectors, Epson will be showcasing its suite of new laser projectors in a variety of creative applications and environments at the Infocomm Southeast Asia 2019 event at BITEC at Booth C20.
