\*1 Print speed (Pages Per Minute) is calculated when printed on A4 plain paper in the fastest mode, 10 x 15 cm photo print speed when printed on Epson Premium Glossy Photo Paper. Print speed may vary depending on system configuration, print mode, document complexity, software, type of paper used and connectivity. Print speed does not include processing time on host computer.

\*2 When printed on Epson Premium Glossy Photo Paper.

\*3 Borderless printing is supported up to 4R, otherwise 3mm top, left, right, bottom.

\*4 Default mode in accordance with ISO7779.

\*5 Quoted yields are extrapolated based on Epson original methodology from the print simulation of Test Patterns provided in ISO/IEC 24712. Quoted yields are NOT based on ISO/IEC 24711. Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature. During the initial printer setup, a certain amount of ink is used to fill the print head's nozzles, therefore the yield of the initial bundled set can be lower.

\*6 USB-connected devices require installation of Epson Device USB Agent on the host computer for Epson Remote Services support.
