Others: Industry-leading print permanence that have WIR display permanence ratings of up to 200 years of colour and 400 years for black-and-white*

*Print Permanence in testing. WIR lightfastness ratings are based on accelerated testing of prints on specified media, displayed indoors, under glass. Actual stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee longevity of prints. For maximum print life, display all prints under glass or UV-absorbing acrylic and protect them from prolonged high-humidity environments. Visit www.wilhelm-research.com for the latest information.

*Warranty granted only for selected models.

Efficient and eco-conscious without compromise

EcoTank printers make the sustainable choice a simple one. They bring together eco-conscious technology with efficient features to help you be more sustainable and productive.

Be Cool and enjoy the benefits

Did you know that Epson EcoTank printers are powered by Epson's Heat-Free Technology, which helps contribute to lower annual energy bills, especially for companies operating high volume of printers. They are also more environmentally friendly. As a result, they produce up to 85% less carbon dioxide[1] and consume up to 85% less power than laser printers[2].

1 Annual CO2 output calculations were based on JEMAI-LCA Pro. Cedar tree CO2 absorption calculations were based on Japan Forestry Agency standards of 8.8kg CO2 per annum per tree.
2 Statistics above are based on results from internal testing conducted by Epson, using Epson L6550 ISO Color 12ipm vs Laser model ISO Color 22ppm test for power consumed to print 20 pages. Testing single page A4 document of ISO Office Final PDF (ISO/IEC 24734). Each test was conducted twice by Epson to ensure consistency of results. Both printers have been tested under same conditions.

Save time with consistent high-speed printing

With no need for the printer to warm up, prints can start immediately. Then, once you've started, you get consistently fast printing, even for high print-density jobs.

Fewer replacement parts, lower environmental impact

Reducing waste is a critical part of being more sustainable. Thanks to our Heat-Free Technology and printhead design, our inkjet printers require significantly fewer replacement parts than laser printers, helping to reduce your environmental impact.

### Save energy and reduce your bills

With no fuser unit to heat, EcoTank printers consume less power than laser printers, keeping your energy bills under control.

No compromise on productivity

Fewer replacement parts also means improved reliability, less intervention and minimal downtime, meaning your business can keep moving with confidence.

How Heat-Free Technology works

Laser printer

Typically this is a complex process and requires preheating the fuser, and heat again to fuse the toner to the paper.

Receive print job → Preheat the fuser → Charge the photoreceptor drum → Laser exposure → Development → Toner transfer → Fusing → Print out

Epson Heat-Free Technology does not require heat in the ink ejection process. Instead pressure is applied to the Piezo element, which flexes backwards and forwards firing the ink from the printhead. This means printer parts last longer and energy consumption is reduced, saving energy, time and money in the process.

EcoTank

Only 3 stages are needed to achieve a printout.

Receive print job → Ink ejection → Print out
