BUSINESS INKJET PRINTER

MENGAPA MEMILIH BUSINESS INKJET PRINTER ?

Epson business inkjet printers menghadirkan kualitas yang luar biasa, kecepatan sangat cepat, handal dan kinerja yang optimal untuk memenuhi kebutuhan bisnis Anda.

Revolutionary Compact PrecisionCore Linehead Design

Advanced built-in Nozzle Verification Technology memonitor kondisi nozzle dan kualitas cetak menyesuaikan secara otomatis tanpa interupsi, bahkan selama pencetakan.

Heat-Free Technology

Teknologi Heat-Free tidak membutuhkan panas dalam proses pengeluaran tinta. Sebaliknya tekanan diterapkan pada Piezo Element, yang melentur ke belakang dan meneruskan tinta dari printhead ke depan.

The Ecological Choice

Lakukan lebih banyak untuk bisnis Anda dan tetap lebih ramah lingkungan. Beralih ke Epson inkjet printer dan lihat bagaimana Anda dapat meningkatkan produktivitas yang lebih tinggi dan menurunkan emisi berbahaya dalam sehari-hari.

Printer inkjet kami menggunakan daya lebih kecil dari printer laser lainnya sehingga Anda tidak hanya peduli terhadap lingkungan, tetapi Anda menghemat biaya juga.

Jumlah karbon dioksida yang dipancarkan oleh laser printer akan membutuhkan hingga 8 pohon untuk menyerap semua karbon dioksida sedangkan printer inkjet Epson hanya butuh 1 pohon.

Part yang terbuang dari Printer inkjet lebih sedikit dibandingkan printer laser.

IT'S IN THE DETAILS.

¹Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab. Two comparison models were selected from color laser multi-function printers in the 65-70ppm class. Tests were conducted at the devices' default settings using Keypoint Intelligence-Buyers Lab standard energy consumption test methods. Calculations were based on a weekday workload of 2 x 4 hours printing + 16 hours in sleep/standby mode, and weekend energy use of 48 hours in sleep/standby mode. A total of 65 pages of workload test pattern (.doc, .xls, .ppt, .html, and Outlook files) were printed 6 times in each 4-hour printing period. ²Annual CO₂ output calculations were based on JEMAI-LGA Pro, Cedar tree CO₂ absorption calculations were based on Japan Forestry Agency standards of 8.8kg CO₂ per annum per tree. ³Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab. Two comparison models were selected from color laser multi-function printers in the 65-70ppm class. Calculations were based on the frequency and volume of consumables and replacement parts required to print 1 million pages (ISO/IEC 24712 test pattern) over a period of 5 years.

MENGAPA MEMILIH EPSON PRINTER ?

Epson large format printer memastikan hasil warna yang luar biasa sehingga menjadi pilihan yang tepat untuk mendukung berbagai bisnis Anda mulai dari Advertising, fashion, retail dan photography.

Print head Epson Micro Piezo™

Print head Epson Micro Piezo™ Thin Film Piezo yang khusus dikembangkan untuk printer Large Format Epson, memiliki performa dan daya tahan tinggi dengan 360 micro-fine nozzles untuk setiap warnanya, memberikan bentuk dot (titik) yang sempurna. Teknologi ini menggunakan Variable-Sized Droplet Technology (VSDT) untuk memproduksi butiran tinta dalam berbagai ukuran sampai sekecil 3.5 pico-litres (pl) yang mampu menghemat waktu mencetak dan mengoptimalkan kualitas. Print head juga dilengkapi dengan Ink-Repelling Coating, lapisan pada permukaan print head untuk mengurangi kemungkinan terjadinya penyumbatan pada tinta. Teknologi printhead yang berupa lapisan tipis unik piezo (TFP) yang memadukan teknologi komponen superior dengan teknologi fabrikasi Micro-Electro-Mechanical-System (MEMS) yang berpresisi tinggi. Hasilnya adalah kecepatan cetak dan mutu gambar yang tinggi untuk pemakaian di berbagai kegiatan usaha dan industri.

Epson LUT (Look Up Table) Technology

Dengan teknologi Epson LUT, hasil cetak printer format besar Epson menampilkan gradasi halus, butiran tampak berkurang dan warna tidak dapat berubah, menjadikan hasil cetak indah dan gambar berdefinisi tinggi.

3LCD PROJECTOR

MENGAPA MEMILIH 3LCD PROJECTOR ?

Projektor Epson 3LCD menghadirkan warna-warna menakjubkan dengan tingkat kecerahan yang seimbang, realistis, dan hasil gambar yang lebih hidup. Tidak heran jika proyektor Epson adalah pilihan utama masyarakat.

EPSON 3LCD TECHNOLOGY UNTUK WARNA CERAH & LEBIH NYATA

3LCD projectors offer brighter and more accurate as they produce different shades and hues by filtering, then mixing beams of the three primary colours (red, green and blue).

In a 3LCD projector, white light is first split into the three beams of primary colours. Each beam is then filtered through its own LCD that will give each individual pixel of the image its exact brightness for each colour. The colour beams are then perfectly recombined in a prism before being projected out as a complete image.

BUSINESS & HOME PROJECTORS GUIDE

The complete projection solution for all your needs.

*Leading Epson business and education projectors vs. leading 1-chip DLP projectors, selected according to NPD data as of July 2015. Based on U.S. research conducted by Radix Research.

DISC PUBLISHER

DISC PUBLISHER
DISCPRODUCER™ PP-50II/PP-100III/PP-100N

Discproducer combines Epson's market leading expertise in advanced inkjet printing and precision robotics to offer an efficient and highly reliable integrated disc publishing solution for a wide range of industries and applications. With Discproducer, fully automated Blu-Ray, DVD and CD publishing is just a push of a button away.

Unrivalled Performance with Cost Savings

Epson's industry-leading Micro Piezo print head and ink technology ensure uniform, stable ink droplets with virtually no satellites or misting, producing brilliant and crisp disc labels at a high resolution of up to 1440 dpi x 720 dpi.

Epson's Micro Piezo™ technology also protects against striation and ink bleed, and allows ultra-fine colour graduation plus razor-sharp text – even in small font sizes.

Instead of using the traditional whole cartridges, Discproducer utilises six individual high-capacity ink cartridges that can be easily replaced quickly, thus allowing you to print more while keeping running costs low.

Convenient Total Front-Operation

Discproducer is the only system in its class that offers the ergonomic advantages of total front-operation and status reporting.

Unlike other systems that allow publishing to continue without ink, Discproducer shows ink level status using an LED for each individual colour. This allows the printing process to be manually or automatically interrupted in case of a near-empty ink cartridge, thereby eliminating damage and waste.

High Precision and Reliability

Discproducer is built to withstand hard knocks and keep dust out. The solid body provides a sturdy housing for the intricate technologies within to run processes smoothly without any interruption.

Misfed and damaged discs are a thing of the past, thanks to the patented AcuGrip robotic arm which handles one disc at a time reliably. This reduces the risk of incurring scratches on the disc, often caused by conventional sliding mechanisms and prevents interruptions during unsupervised production, caused by mechanical blockage.
