FAQ

1. Issue of the printing via USB connection

Issue:

On Mac with ARM64 processor, when printing via USB connection, the “Missing USB class driver” message is shown, and the print process doesn’t progress.

Workaround:

- For printer with network connection, please print by using Epson printer driver via network connection.
- print by using AirPrint driver via USB connection.

Solutions:

- Update the Printer driver to Ver.10.85 or later. (Latest version)
- Update macOS Big Sur (OS) to 11.1 or later. (Latest version)

2. Issue of the X-Rite i1 Scanner (bundle with Perfection V850)

Issue:

On Mac with ARM64 processor, the application does not work correctly.

Workaround:

None

Solutions:

Issue will be resolved by new update for the the application from X-Rite.
