

# Providing best value devices, consumables and parts in passbook printers

# EPSON PROVIDES BETTER PRICE, QUALITY AND TECHNICAL SERVICE

At Türkiye Finans Katılım Bankası, Epson's PLQ-20 Passbook printers are used daily. Being offered the most suitable devices, consumables and spare parts, as well as being provided with technical service for their printers were key factors in their decision to choose Epson's products.

## RECOMMENDING EPSON

Ömer Yasan, Vendor Relationship Manager at Türkiye Finans Katılım Bankası, says: "We advise all organisations to take into account the quality of the devices, suitability of the consumables, widespread technical service and quick solution solving capabilities when choosing a brand. Therefore, we would definitely recommend Epson's products to all organisations."

## Quality and price are important in intermediate products, consumables and spare parts

Ömer Yasan comments: "Epson offered the most suitable devices, consumables and spare parts with their passbook printers. Furthermore, being provided with technical service for our printers was an important factor in shaping our choice. For projection devices, on the other hand, factors such as high levels of product quality, a broad technical service network, suitable consumable/spare part prices and a special price offer for our company, were also key considerations when making our choice."

## Türkiye Finans Katılım Bankası

***We advise all organisations to take into account the quality of the devices, suitability of the consumables, widespread technical service and quick solution solving capabilities when choosing a brand. Therefore, we would definitely recommend Epson's products to all organisations.***
