ELEVATE YOUR BUSINESS WITH CUTTING-EDGE SOFTWARE SOLUTIONS.

Epson Solutions Suite provides a range of software, options and services to improve document security, manage device fleets, reduce costs, and simplify workflow processes.

Epson
Solutions Suite

ENGINEERED FOR good

Security
The security to run your business with peace of mind.

Freedom to work anywhere
Providing an environment that allows you to work from anywhere using IT, regardless of the location.

Work efficiency
Streamlining operations and improving work performance.

Eco conscious
Reducing environmental impact through the resource-saving and low power consumption of inkjet printers.

Stress-free operation
Increasing productivity by reducing the burden placed on the printing environment and ensuring stable operation of output devices.

Epson Device Admin

Setup, manage and deploy a fleet of Epson devices remotely with a single application. Ensure maximum uptime, productivity and cost savings with automatic alerts and reporting capabilities.
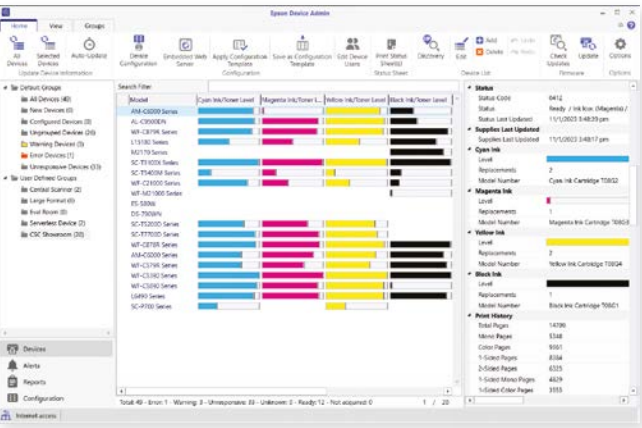

Simplify Deployment
Search and discover devices in the network. Setup and deploy a fleet of Epson devices with batch configuration.

Easy Management
Monitor and view the status of multiple devices with a single interface. Manage devices in groups, making it easy to trace and locate them especially for large installations.

Keeping up to date
Get notified when an update is available for a product. Conveniently schedule and push the firmware update to multiple products at the same time.

Improved Uptime
Receive alerts automatically via email notifications when the device faces a warning or error. It provides accurate information of the issue, reducing the time needed for troubleshooting.

Cost savings and Accountability
Generate highly customisable reports to account for usage on each device for cost saving activities. Implement Managed Print Services with scheduled reports.

Compatibility with a Wide Range of Products
Compatible with a wide range of products including printers and scanners by network connection or local devices connected via USB to PCs in the network.

*Networked business inkjet printers, laser printers / MFPs, business scanners and large format printers.

Epson Remote Services (ERS)

Monitor and manage your devices from location through the internet with a cloud-based system. Run billing programmes and provide accurate support by checking the current status of the devices installed in your customer's premises.

Epson Print Admin

Manage print jobs and control usage of Multifunction Printers (MFPs) in your organisation. Secure the use of MFP functions through authentication preventing unauthorised usage. Release print jobs and distribute documents automatically based on the user's account information.

Cloud-based Fleet Management
Access Epson Remote Services from anywhere in the world through Internet connection using a web browser on PC or mobile devices.

Monitor the status of devices and the consumables at a glance. Manage devices in groups for easy asset tracking.
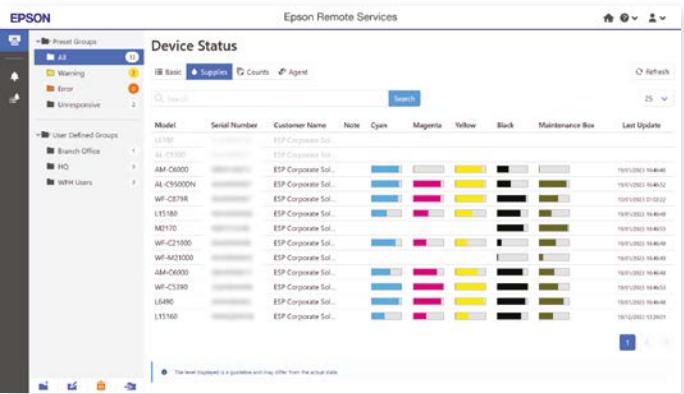

Advanced Reporting Features
Generate various reports for click-charge billing without the need to head down to the site. Customers themselves may use the report for cost saving activities.

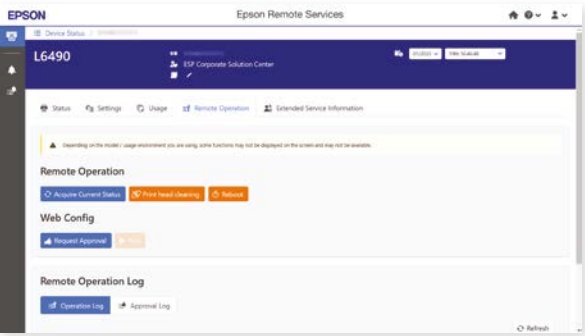

Improved Uptime
Set automatic alerts for notifications by email when the consumables run out or devices face an issue. Up-to-date information about the case is included for effective support.

Efficient Service Support
Reduce time spent on troubleshooting and resolve issues on the first visit by retrieving the latest and most accurate information about the device from ERS. Users who do not have technical knowledge can be guided or have their issues fixed with the use of various remote operation tools.

Enhance Security and Reduce Waste
Improve security by preventing unauthorised use of devices with authentication function. Supports a variety of products with a single server. Authenticate users with User ID/ Password, ID cards and ID numbers.

Prevent leakage of confidential documents due to unattended documents and wastage of unnecessary prints left on the device by releasing print jobs upon authentication.
Integrate with Existing Infrastructure
Sync with directory services to import the user database and integrate with SMTP mail for document distribution, notifications and reporting functions.

Improved Convenience
Release print jobs on any available printer closest to you with no limitations. Automatically distribute documents and log in using your User ID with 'Scan to Me,' preventing mistakes when entering the recipient's email address.

Keep workflow simple and secure by assigning only the required functions for each user or group.

Web-based Management Console
Access and manage the server from a web browser in the network.

Cost Management and Accountability
Set rules and policies to save cost on printing. Credits and printing quotas can be set to reduce unnecessary printing. Generate various reports for accountability and improve efficiency. History reports are available for document tracing and auditing purposes.
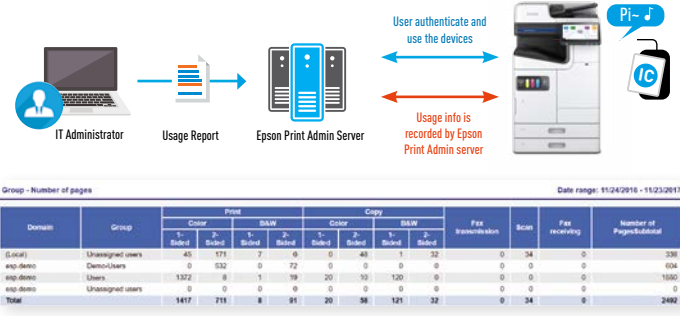

Advanced Workflows*
Expand the capabilities of document distribution with Epson Print Admin Advanced Workflows. Apply advanced scan settings to "Scan to" functions and create searchable PDF files with built-in OCR capability.

Improve job efficiency by sorting documents from a batch automatically by various detection methods. Easily locate and track scanned documents with indexing. Print and scan directly on the device panel with connection to enterprise cloud storage services.

*Epson Print Admin Advanced Workflows is a paid add on feature.
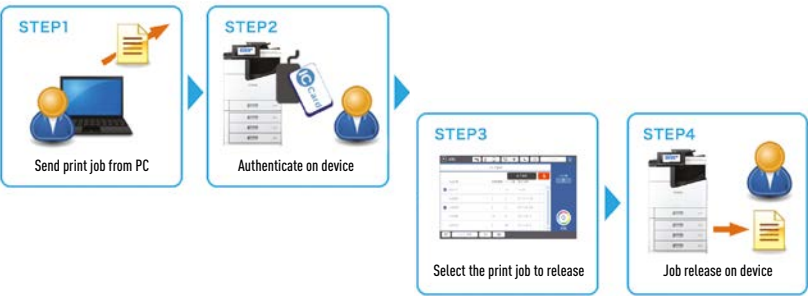

Epson Print Admin Serverless

Create a secure printing and scanning environment without the need to install a server. Improve security through user authentication and conveniently distribute documents by email or to folders based on the user's accounts. Manage printing cost by setting printing quotas, generate reports for accounting and document tracing.

Printer Options

Expand the capability of multifunction devices to suit your business operations by activating additional features for use right on the device without the need to install additional software.
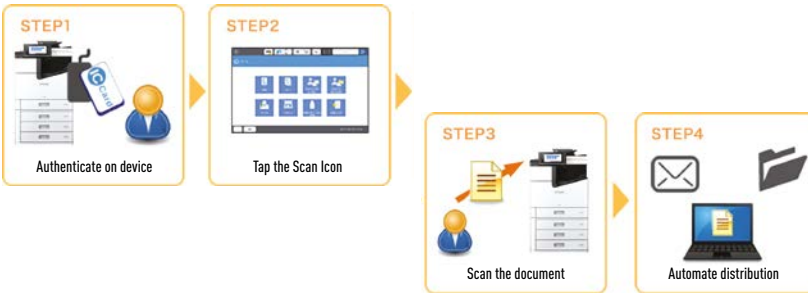

Enhanced Security and Reduce Waste
Improve security by preventing unauthorised use of devices with authentication function. Authenticate users with User ID/Password, ID cards and ID numbers supporting up to 1,000 users in the local database without the need for a server.

Prevent leakage of confidential documents due to unattended documents left on the device by releasing print jobs upon authentication. Waste is also reduced by reducing the amount of unnecessary printing.

STEP1 Send print job from PC — STEP2 Authenticate on device — STEP3 Select the print job to release — STEP4 Job release on device

Improved Convenience
Release print job from a printer closest to you, supporting up to 5 devices in a group. Use "Scan to Me" functions to distribute documents automatically based on the logged in User ID and prevent mistakes when entering the recipient's email address.

STEP1 Authenticate on device — STEP2 Tap the Scan Icon — STEP3 Scan the document — STEP4 Automate distribution

Share the use of Common Tasks
Selected functions can be allowed to be used on the device panel without the need to authenticate.
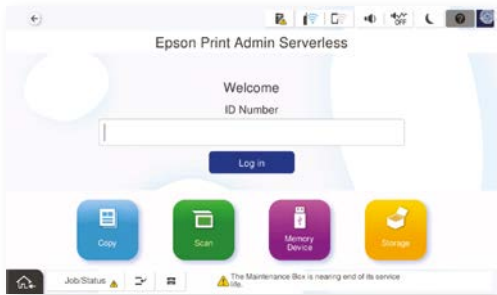

Cost Savings and Accountability
Set usage restrictions and printing quota for each user to manage printing costs. Generate usage reports for users or departments and job logs for accountability.
## Convenient Device Management
Manage a printer through a web browser or in batches with Epson Device Admin. Manage user accounts in the local database or import users from LDAP server.

Erase Red Colour
Removes red coloured objects in the scanned image or copy.

Print Sets
Print or copy documents of various quantities for distribution to different groups and number of members.
OCR Option
Enable built-in OCR functionality directly on the device for Scan to Folder and Email without the need to install software. This function also requires the OCR Unit-P1 option.

IP-Fax
Enables sending and receiving fax through IP address.

This option also requires at least 1 Super G3/G3 Multi Fax Board option installed.

Internal Send / Receive IP Fax — VoIP gateway — Telephone Line — External Send / Receive G3 Fax — LAN (Intranet)
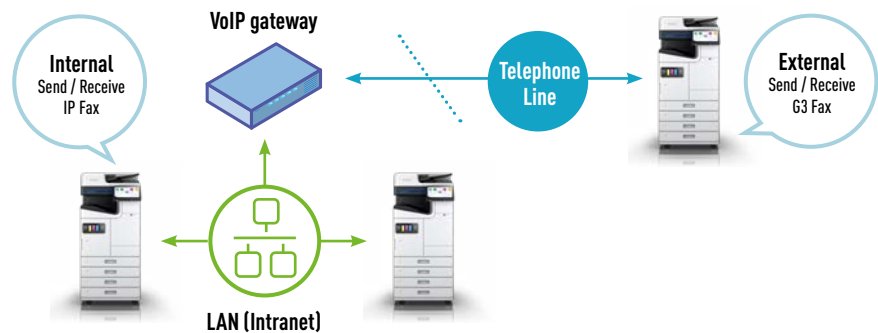

*Requires Epson Device Admin version 4.0 or later to generate the report for Epson Print Admin Serverless.

Epson ScanSmart

Convert documents to digital formats simply with "Scan and Save" function. Send documents to the cloud for convenient collaboration and export files to editable formats with built-in OCR functionality.

Document Capture Pro

Simplify your scanning workflow and automate your scanning tasks for processing or send documents to cloud storage services with Document Capture Pro. Convert documents into Searchable PDF files or editable Office documents with built-in OCR capability.

Simple User Interface
Large buttons makes it simple and easy for operation. Preset your scan settings and continue to use it with these buttons.

Simple Operation
Review, rearrange and rotate pages right after scanning and export it to a file.

Automatic Image Processing
Automatically remove blank pages and orientate documents based on text characters.

Versatile Output Capability
Attach scanned images to email clients or send the files directly to popular cloud storage services.

Built-in Character Recognition
Create searchable PDF with built-in Optical Character Recognition capability which allows users to locate their documents easily by searching for keywords. Export documents to editable formats such as DOCX, XLSX and PPTX*.

Automatic File and Folder Naming
Automatically detect keywords like "Invoice", "Bill", "Contract" or add up to 64 customisable words to name files or folder selection.

Stitch Image
Available for selected MFP models only

Stitch images together when scanning a document larger than the document glass.

Scan and Save documents with a simple interface
Easily perform scanning tasks with large buttons with less operation steps.
Simply Scanning Tasks
Create up to 30 highly customisable scan jobs to automate your scan processes and assign them right to the device panel.
Built-in Character Recognition
Create searchable PDF files to search for documents or keywords within. Save documents into editable formats such as DOCx, XLSX and PPTX*.
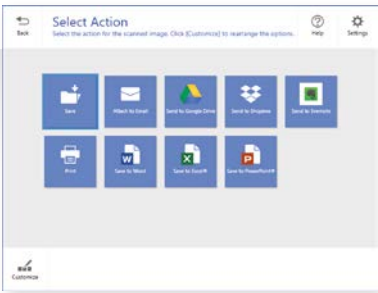

Wide Variety of Output Options
Export your documents to a variety of destinations. Save them to folders, send directly through email or popular online storage services. Images can also be forwarded to a printer to make a copy.

Document Distribution with Job Separation
Sort and distribute documents efficiently by automatically detecting text characters, barcodes, patch codes, blank pages and form types. Split files automatically by fixing the page and file size limit.

CASE 1	CASE 2	CASE 3	CASE 4
Batch Separation into folders by Barcode Detection	Job Separation by Barcode, save as multi-page PDF	Job Separation by Blank Page into separate folders (Blank Page removal)	Batch Separation by Fixed Number of Pages, save as multi-page PDF
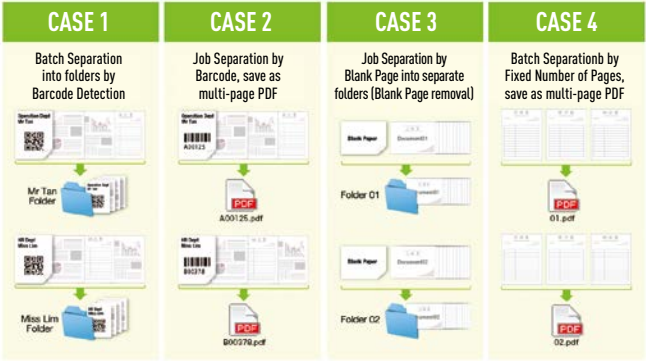

Advanced Indexing and Data Capture
Create indexes to locate documents. Capture text and barcode information from fixed zones of documents including the MRZ of travel documents and export it for processing.

Security and Accountability
Prevent unauthorised usage by securing scanning equipment with a password. Trace documents with the use of logging functions.

Enhanced OCR functions^
Further improve OCR accuracy and support additional languages with Kofax OCR engine. Capture data from documents with "User-defined indexing" function.

Available for Mac users
Simplify scan process with easy scan & save operations and create searchable PDF files.

Document Capture Pro Server

Centralise your scanning tasks and manage your fleet of scanning equipment with a web browser without the need to install drivers on each computer. Locate documents easily and improve document security by index logs.

Manage and Centralise Scanning Equipment in the Network

Manage and control up to 1,000 scanning devices in the network with a web browser allowing up to 40 devices for concurrent usage.

- **Automate Processes**
  Manage and centralise scanning by creating and assigning up to 30 customisable job settings to the device panel for walk-up operation. Process documents automatically with features like automatic orientation and sorting using various methods.

- **Advanced PDF Features**
  Create searchable PDF files with built-in Optical Character Recognition (OCR) capability to easily locate documents by keywords and secure documents with passwords to prevent unauthorised distribution and duplication.

- **Advanced Indexing**
  Create customisable index files with the use of file information to easily trace and locate documents.

- **Improved Security**
  Secure scanning devices with a password to prevent unauthorised usage and track documents with log reports.

Document Capture Pro Server – Authentication Edition*

Further improve document security with Authentication function for supported models and advanced reporting features.

- **Prevent Unauthorised Usage**
  Authenticate users based on a user database by User ID/Password, ID Card or ID Number. Supports various ID card readers.

- **Integration with Existing Infrastructure**
  Sync with directory services to import the user database and integrate with SMTP email services for document delivery, alerts and reporting functions.

- **"Scan and Send to me" Function**
  Improve convenience and prevent leakage of confidential information by distributing documents based on the user's account designated Email address and folders.

- **Accountability**
  Generate detailed usage reports for each user, device or job for accountability. Generate job logs for document tracing.

Serverless Authentication For Scanner

Secure the scanner with built-in authentication function to prevent unauthorised usage of the device without additional software. Improve document security and distribute documents automatically based on each user's account information.

Enhance Document Security by Authentication Function

Secure the scanner to prevent unauthorised usage with user ID and card readers. Automatically route documents based on log in user ID with "Scan to Me functions".

Improve Convenience

Improve convenience by starting the scan job automatically upon authentication with auto scan feature. It helps to create a clean and safe environment by minimising the touch points.

Simplify Workflow and Automatic Routing

Customise the layout of One-touch Functions to display on the device and assign pre-sets to each user for easy operation.
Administer and Manage Accounts

Manage up to 50 user accounts locally on the device database or unlimited with LDAP server.

Document Tracing and Accountability

Locate documents easily with job logs to account for usage by user ID level with reporting function.

Epson Connect

Epson Smart Panel Mobile App

Epson Connect is a cloud solution that allows users to print and scan from anywhere in the world with any device.

Setup and control your printer or scanner from smart phones and tablets so you can print, copy, scan, and troubleshoot directly through the app.

Epson Email Print

Print to any Epson Email Print enabled printer from any device that can send email, such as your smartphone, tablet or computer.
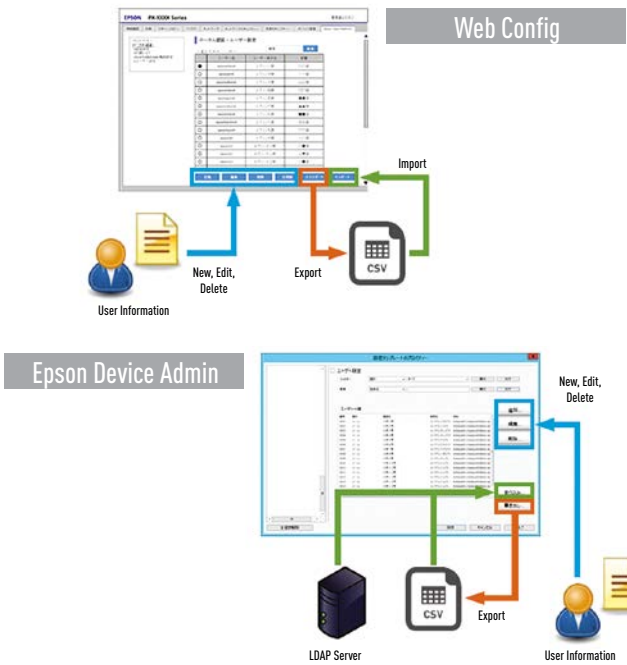

Epson Connect

Send an email from any device   nro72cyrc7f3@print.epsonconnect.com

- Assign a unique email address to the printer.
- Prints the email body and/or attached files.
- Supports DOCX, XLSX, PPTX, PDF, JPG, GIF, TIF, BMP and PNG files.
- Secure the printer with an "Approved Senders List".
- Receive automatic notifications about the printing status.
- Track usage with job logs.

Remote Print Driver

Enable printing through internet connection from your computer and mobile devices. It's as simple as clicking on File/Print to send your file to a remote print enabled Epson printer from anywhere in the world.

Remote Print Driver

Install the Remote Print Driver   Connect to the printer by the unique email address   Send the print job thru the internet

- Supports printing with advanced printer settings directly from a PC application.
- Print from anywhere in the world with "Print from Anywhere" function in Epson Smart Panel.
- Protect the printer from unauthorised usage by setting up an access key.

Scan to Cloud

Scan and send images to a recipient via email or save directly to popular cloud storage services.

"Scan to Cloud"

Email Address
box
Dropbox
evernote
Google Drive
OneDrive
SharePoint Online Online

Operate from Panel   Epson Connect   Output to various destinations

- Easy operation from the device panel.
- Allows scanning directly to an email destination without an email server.
- Supports popular cloud storage services: Box, Dropbox, Evernote, Google Drive, Microsoft OneDrive* and SharePoint Online.
- Use Scan to Cloud to send documents to another Epson Connect enabled printer to simulate a fax environment.
- Track scanned documents with Scan Log.
- Supports a wide range of MFP and business scanners.

Epson Bridge for Universal Print for Home

Enable printing to an Epson Connect supported printer while connected to the company's VPN connection while working from home.

Print data & Entra ID   Print data & Printer's Email Address   Print data

Windows PC which log in MS account   MS Universal Print Service   Epson Connect   Supported Printer

- Register and utilise any Epson Connect supported printer with Microsoft's Universal Print service.
- Deploy printer drivers without impacting the security of the company's computer equipment.
- Enhance document security with encryption by using Microsoft Universal Print.
- Monitor and trace document leaks from staff who prints documents on personal printers when working from home.

Easy Wi-Fi Setup

Provide new users with an easy step-by-step guide in a chat format to setup their product.

STEP 01   STEP 02   STEP 03   STEP 04
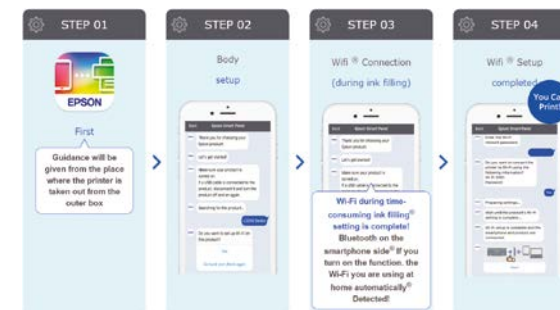

Contactless Operation

Print and scan directly from your mobile devices. Use advanced features for copy on devices without LCD panel and print through the internet connection with Print from Anywhere.

Support a Wide Range of Products

Control your inkjet printer, multifunction printers, scanners and large format printers with a single app.

Scan and share documents

Scan documents with advanced settings or capture documents with the camera of mobile device and share it through installed apps.

Customisable UI

Switch between Card UI or Tile UI, rearrange and hide unnecessary functions for convenient usage.
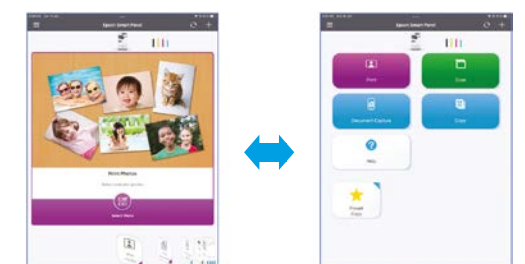

Easy Troubleshooting

Monitor the status and easy access to manuals and guides to help troubleshoot problems arising with the product.

L15180 Series
Printer is ready.

*Supports OneDrive for Business. Scan to Cloud does not support Dropbox Business: Team Folders, Google Drive: Shared with me, Google Workspace: Shared drives, Microsoft OneDrive: Shared.
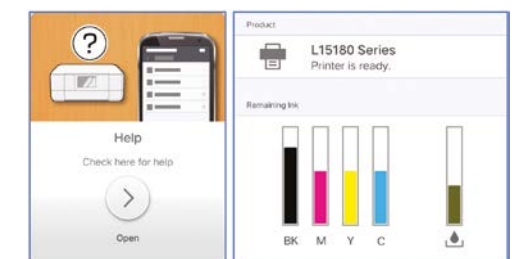

Epson Open Platform

Epson Open Platform provides an interface between an Epson Device and applications allowing the users to experience seamless access to workflow solutions. Software vendors can use Open Platform API to embed their solutions onto the panels of Epson Devices to expand the compatibility of their solutions.

Print Management with Epson Print Admin
Enhance security by managing print jobs and distribute documents securely with Epson Print Admin solutions via the Epson Open Platform interface. Epson Print Admin is available as a solution for Epson Open Platform.
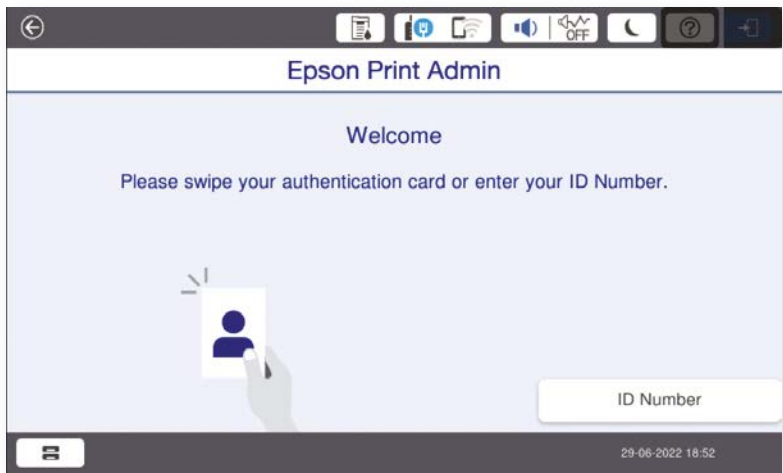

Compatible with Third-party Software Solutions
Epson Open Platform is compatible with a range of thirdparty software solutions for print management and document processing. New customers with specific requirements or existing customers of solutions can now consider to include Epson devices into their workflow.

Support for ID Card Readers
Epson Open Platform supports a range of ID card readers to authenticate users.

Developing with Epson Open Platform
Software vendors can develop their solutions with Epson Open Platform API using HTML, CSS and JavaScript to integrate Epson devices into their software solutions. On-premise and cloud solutions are supported. Please contact Epson if you want to integrate Epson products into your solutions with Epson Open Platform.

Application Server

Open Platform supported device

---

Scanner Software Development Kit

Epson offers an Application Programming Interface (API) that enables integration of Epson scanners into customised applications, mobile apps, solutions and connectors to additional cloud services. Epson partners can develop their solutions with concepts and manuals to assist them. To aid partners in developing solutions for their customers, Epson provides SDK in several packages with sample codes to meet their requirements.

For PC Applications
SDK packages for integrating Epson scanning devices to PC applications.

Customer's Application — Scanning Device
- Capture images directly from a customised app using TWAIN API.
- Integrate with Epson Scan SDK to control the scan settings of an Epson Scanner directly within an application.
- Extract text characters and barcode data from specified areas of documents for data input, file / folder naming or use as job separator.
- Scanner libraries are available in C++, C#, Visual Basic, JavaScript, and Java programming language.
- Includes web extension to support integration with web application with JavaScript.
- Support Windows and Linux applications.

For Mobile Applications
SDK packages for integrating Epson scanning devices to mobile applications.

Customer's Application — Scanning Device
- Use embedded scanner library in Java and Swift to integrate scanner functions into a mobile app running on Android, iOS, and iPadOS.
- Import images to an application by scanning and returning the images through Epson DocumentScan mobile app in Android and iOS environments.

For Integrating with Document Capture Pro solutions
For simplifying deployment, running jobs in Document Capture Pro from an application and create customised output destinations for output in Document Capture Pro.

Scanner

Document Capture Pro   Custome Connector   Document Cloud
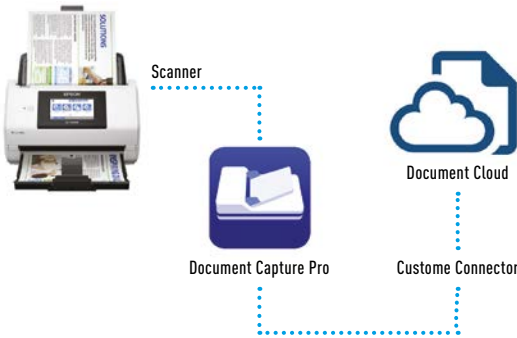

- Simplify deployment of customised job settings by repackaging preset jobs into the installer.
- Run a pre-set job setting in Document Capture Pro using command line.
- API to develop connectors to send images from Document Capture Pro or Document Capture Pro Server to a cloud storage folder.

Please contact your local sales representative for more information.
