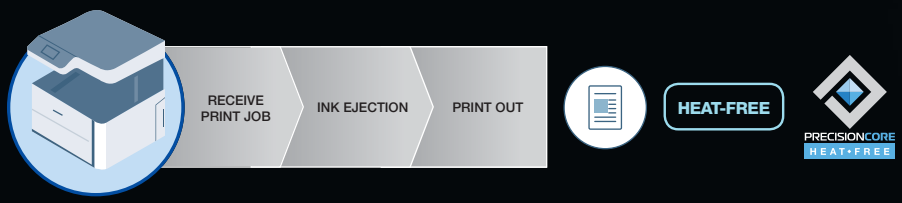
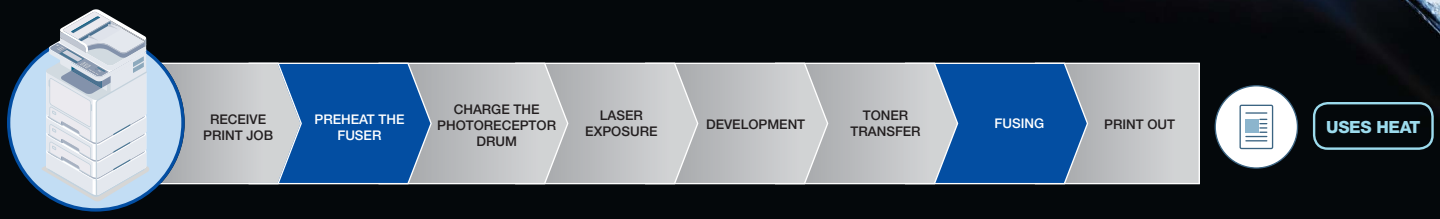
EPSON ECOTANK PRINTER



LASER PRINTER



Save time with consistent high speed printing

No heat is required to warm up, allowing the printer to print immediately with 5.5secs of first print out time. Consistent high speed printing of up to 25 pages per minute which increases productivity in workspaces.

Less power consumption saves energy and money

With no fuser unit to heat, our printers help to reduce energy consumption compared to laser printers, resulting in cost savings for electricity bills.

Fewer replacement parts, lower environmental impact

Uses fewer replacement parts than laser printers. As our printhead is not a consumable, it greatly reduces impact on the environment.

Less intervention increases productivity

With fewer parts to replace and printheads that last longer, the amount of intervention is decreased, providing improved reliability and reduced downtime.

Advanced Workflow Solutions

Stay competitive with solutions that can drive your business forward. Our Advanced Workflow Solutions is designed to help you get the most out of our business printers.

* In accordance with ISO 24711/24712. Actual yields will vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink colour. A variable amount of ink remains in the cartridges after the "replace cartridge" signal. Part of the ink from the first cartridges is used for priming the printer. Ink is used for both printing and print head maintenance. All inks are used for both black and colour printing.
