PRECISIONCORE HEAT-FREE

DURABLE PRINTHEAD

Productivity Meets Durability
With PrecisionCore Printhead enabled, L3550 and L5590 has faster printing speed at 15/8 ipm. Improved mechanical design on parts that support paper feed-out contributes to longer product life — 2 years or 50,000 pages**.

Sustainability in Mind
Reduce power consumption through Heat-Free Technology. With hardware made from 30% recycled plastic[1], utilising 84% less consumables compared to ink cartridge models[2] and over 80% recycled cardboard packaging, carbon footprint is minimised.

Simplify User Interface
New concept of Flip UI simplifies user operation. Preset your frequently used functions as different cards, reducing the hassle of going through numerous setting parameters.

* Available only on L5590. ** 2-year warranty or 50,000 pages, whichever comes first, printhead included.
[1] Virgin plastic savings equivalent to approximately 250 plastic spoons, calculated as 3g of High Impact Polystyrene (HIPS) plastic spoon. Ratio of the amount of recycled plastic weight to overall plastic component weight of the hardware. The amount of recycled contents and recycled material varies depending on the model, manufacturing time and site.
[2] Material weight comparison of consumables (including packaging) between Epson ink cartridges of WF2630 series and Epson ink bottles of L5590/3550 series.

*1 Print speed (Pages Per Minute) is calculated when printed on A4 plain paper in the fastest mode, 10 x 15 cm photo print speed when printed on Epson Premium Glossy Photo Paper. Print speed may vary depending on system configuration, print mode, document complexity, software, type of paper used and connectivity. Print speed does not include processing time on host computer.

#1 Black Text   #2 Colour   #3 Photo 4R

*2 When printed on Epson Premium Glossy Photo Paper.

*3 Otherwise 3 mm top, left, right, bottom.

*4 Default mode in accordance with ISO7779 for MFPs.

*5 In accordance with ISO 24711/24712. Actual yields will vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink colour. A variable amount of ink remains in the cartridges after the "replace cartridge" signal. Part of the ink from the first cartridges is used for priming the printer. Ink is used for both printing and print head maintenance. All inks are used for both black and colour printing.
