EPSON
EXCEED YOUR VISION

ALWAYS THE RIGHT ANGLE FOR YOUR BUSINESS.

Epson's 3LCD projectors come with smart focusing and real-time auto vertical and horizontal keystone correction for a picture perfect presentation even from odd or uneven placements. Need to shift your projector for any reason? No problem – the image is automatically corrected to give you the right angle in less than a second. And with 5,000 lumens of projection brilliance, they shine through in every situation, even in brightly lit environments.

ENGINEERED FOR BUSINESS

Clear, Impressive Presentations
Brightness of 5,000lm for high image visibility even in rooms of up to 60-100 people without dimming the lights.

Projection Versatility and Flexibility
With real-time auto V&H keystone correction, the advanced algorithm displays a corrected image in less than a second.

Clear Images with Accurate Details
Farouda DCDi and "Focus Help" features provide high performance de-interlacing, noise reduction and sharpness enhancement.

No.1

3LCD

3X Brighter Colours

Dimming the lights during presentations is a thing of the past. With Epson's advanced features, you can enjoy uncompromised image quality even in a brightly lit room.

Deliver Clear, Impressive Presentations

With a high 5,000 lm* brightness setting, drawing the curtains or switching off the lights during presentations is a thing of the past. This projector series features high image visibility even in a well-lit meeting room.

* For EB1960/1965 only.

## Projection Versatility and Set-up Flexibility

Real-Time Auto V&H Keystone Correction

These projectors provide advanced, auto vertical and horizontal keystone correction.* With this newly developed correction feature, you can conveniently position the projector anywhere in the room. Simply turn on the power and direct the projector towards the screen or wall, and the image will be automatically corrected in no time.

With real-time keystone adjustment, this allows the projector to display the corrected image less than a second after detecting a projector motion. This adjustment speed lets you display a rectangular screen even while you are moving the projector.

* For EB-1935/1945W/1955/1965 only

Screen Fit

In cases where the image extends beyond the frame of the screen or whiteboard, simply push the "Screen Fit" button to automatically adjust the image frame with the edges of the screen. This feature allows you to focus more on your presentation than on adjusting the projection output.

* For EB-1935/1955/1965/1945W only

Clear images with accurate details

Farouja DCDi - Eliminate Jagged Lines

This projector series features Faroudja DCDi® (Directional Correlational Deinterlacing) Cinema chipset, a video enhancement technology that produces an exceptional image quality without introducing artefacts. Faroudja DCDi was developed to eliminate jagginess by using a unique algorithm, so your video-based presentations remain sharp all the time.

Original image

DCDi off

DCDi on

## Farouja DCDi - Enhanced Sharpness

Greater depth and perception add appeal to your presentations. With TrueLife enhancement, a sharpness enhancement technology, the projector identifies and enhances transitions, such as skin texture, freckles and hair, to produce images with remarkable clarity and colour. Presentations have never been more compelling, with videos and images that are more visible and lifelike.

Without DCDI

With DCDI

DICOM SIM Mode

This colour mode produces images with clear shadows, ideal for projecting X-rays and other medical images.*

* Not for actual medical diagnosis

Normal colour mode

DICOM SIM mode

Focus Help

With the Focus Help button,* you can adjust the focus easily by looking at the figure and bar gauge displayed on the screen during adjustment.

This function is especially helpful for users who want image accuracy during their presentations or when the adjustment of the image is done by a single person.

* For EB-1935/1955/1965/1945W only

Network Management For Easy Monitoring

EasyMP Monitor

With Epson's network monitoring and control software, you can see from a single PC which projectors are available and whether they are running efficiently – even across the biggest network.

You can configure your projectors and access their serial numbers remotely, as well as receive instant email alerts for pre-defined critical indicators such as non-functioning devices or overheating lamps.

Message Broadcasting

Now you can send messages or announcements as JPEG files simultaneously to any number of projectors on a network. This makes the projector series very useful for immediate communication needs or even emergencies.

* This is a plug-in software of EasyMP Monitor.

Enrich Presentations with a Single Projector

Split Screen

Split screen allows inputs from two separate sources to be displayed side by side on the screen. In a video conference, for example, images of presentation materials and remote participants can be shown simultaneously.

Multi-PC Projection

With Epson's "EasyMP Multi PC Projection" freeware, screens can be displayed simultaneously using a network – for more interactive meetings. Up to 32 computers can connect to one projector on a network, with screens from any four computers being projected at a time.

* For EB-1935/1955/1965/1945W only

Experience Convenient, PC-Free Presentations

Epson iProjection

With the iProjection application for both iOS and Android, wireless projection from a smart device is made possible.* This feature supports various files and allows you to present your smartphone contents with ease. It also lets you use other touch-screen operations, such as flicking to turn pages and pinching to zoom in or out. For EB-1930/1950/1960/1940W, wired LAN connection with wireless access point is required.

* In iProjection, projector profile search, multi-screen display, distribution function, audio transfer, movie file transfer, interrupt connection disabling and encryption data transfer capabilities are not supported.

PC Free

Simply save movie files like MPEG2/4*, Motion JPEG compressed videos, JPEG/BMP/PNG/GIF pictures and PDF files to a USB memory device, insert into the projector and the files are projected automatically. You can just bring the data along without the need of a PC.

* For EB-1935/1955/1965/1945W only

Eco Features

- Uses just 0.44W of power in standby mode
- Projector optics employ lead-free lenses
- Unpainted plastic housing reduces the environment impact
- The flame retardants used in the plastic housing do not contain chlorine or bromine

COLOUR BRIGHTNESS
Know your projector lumens

SEE VIBRANT, REALISTIC COLOURS WITH HIGH COLOUR BRIGHTNESS.

A New Specification

Projectors have always had their brightness rated only for white light. However, they may have very different colour brightness levels. The Colour Brightness specification provides a new way for buyers to compare the holistic performance (white and colour light brightness) of projectors to make a more informed decision.

Epson
Colour Brightness 2600 Lumens
White Brightness 2600 Lumens

Competitor
Colour Brightness 750 Lumens
White Brightness 2700 Lumens

Why Does Colour Brightness Matter?

Even if a projector has high white brightness, it's Colour Brightness could be as low as 1/3 of its white light brightness specification. With a projector that has high Colour Brightness, you'll see vibrant, realistic colours; but if Colour Brightness is low, colours can look dull and dark, skin tones can be reproduced poorly and important details can be lost.

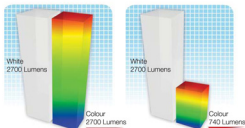

Epson   **Competitor**

What is Colour Brightness?

As the term implies, Colour Brightness is a new international standard that states a projector's colour light output in lumens. It measures the brightness of a projector's red, green and blue light.

These are the measurements to look for:
Colour Brightness - Colour Light Output
White Brightness - White Light Output

Epson   **Competitor**

How to Find a Projector's Colour Brightness?

1. Look for separate Colour Brightness and white brightness specification.
2. Projectors with similar white brightness levels can have vastly different and significantly lower Colour Brightness levels.
3. Many manufacturers may not want you to know their projectors are only 1/3 as bright when measuring colour.

Advantages of 3LCD Projection System

Bright Images and Faithful Colour Reproduction

3LCD projectors offer all-time colour (Red, Green and Blue) projection thereby ensuring faithful full colour reproduction. This is suitable for projection of colour intensive images such as videos, photographs and colour charts.

Incredible Details

3LCD projectors are able to produce an unparalleled range of grayscale images, which contributes to delivering incredible colour images that are smooth and seamless.

Prism   Blue

Mirror

3LCD projector : RGB are projected at the same time, which makes the single composite image easy on the eyes.

** HTPS (High Temperature Poly-Silicon) is an active matrix transmissive LCD. It is extremely small and produces high-quality images.

Gentle on the Eyes

3LCD projectors' images do not suffer from colour break-up (commonly known as the rainbow effect). The projections are easy on the eyes as you will not be affected by any distorted pattern.

3LCD projectors use 3 separate LCD panels to form a continuous image containing all colours (red, blue and green) ensuring smooth video playback, even for rapid-motion images.

Reliable Technology

With more than 70 million 3LCD chips shipped to date, the powerful and road-tested 3LCD projection technology is extremely reliable, and is trusted by many throughout to deliver sharp and true-to-life images.
