SCANNER
EXPRESSION™ 11000XL

Fast and flexible, the Expression™ 11000XL deftly handles every scanning task for media up to A3 in size. An optical resolution of 2400 dpi and optical density of 3.8 Dmax ensure crisp, professional results while the optional Transparency Unit expands its capabilities to cover a wide variety of film formats.

Extraordinary Image Quality

At the heart of the Expression™ 11000XL is a high-definition CCD sensor with a resolution of 2400 x 4800 dpi. To eliminate image 'ghosting', the sensor is covered with anti-reflection coated glass while Epson's Micro Step Drive™ technology moves the optical carriage with ultra high precision to produce greater detail. Together with an optical density of 3.8 Dmax and 48-bit depth, the scanner allows you to easily and consistently achieve scans with superior tones and colour reproduction.

Impeccably Sharp and Clear Scans

Beyond optical resolution, the CCD sensor sports a longer 6-line CCD sensor array with 5.5µm pixels that provides greater scanning details during every pass. The scanner is also equipped with an Auto Focus system for clearer and sharper scans. The optical system can achieve pinpoint focusing automatically, or allow you to take full creative control via optional Manual Focus.

Versatile Film Support

With the optional Transparency Unit installed, the Expression™ 11000XL becomes a film scanning powerhouse. It accepts a wide range of film formats and comes with 2 units of film holders for each type of film format: 35mm strip film or mounted film, 6 x 12cm medium format film, 4" x 5" large format film, 8" x 10" film and even A3-sized transparencies*.

*No film holders are provided for A3-sized transparencies.

Bundled Software

Epson Scan

Epson Scan offers imaging professionals an array of enhancement tools that provide immediate correction of defects on films and photos.

Colour Restoration

Restore original colours of faded photos to make them look new again.

Dust Removal

Automatically eliminates dust and specks on film scans.

Grain Reduction

Reduces the grainy and rough appearance of enlarged images from films by applying a smoothing filter.

Advanced Image Adjustment Tools

Tap upon a host of advanced tools to achieve the best results.

LaserSoft SilverFast® Ai

A professional scanning and imaging software that includes dust and scratch reduction, noise elimination functions and automatic colour calibration with IT8 target.

Better Colour and Faster Image Processing

Thanks to its powerful built-in ASIC chip, image processing is completed in a shorter time and without having to depend on the computer's processor capacity.

High Performance Lamp

The Expression™ 11000XL is equipped with a dedicated high-brightness Xenon lamp that starts up instantly without any warm-up time, allowing you to complete your scanning tasks faster. For negative film scanning, a bluish lamp is used to shorten the exposure time required to optimise the scanning speed.
